

January - February 2024 - Full Insights Report
Priorities for the new UK Government to focus on for people
living with neurological condition(s)

About NeuroLifeNow

NeuroLifeNow was launched in January 2021, enabling people to meaningfully share their daily realities of living with a neurological condition(s) to inform positive change to policy and services.

NeuroLifeNow aims to capture real-time evidence, at scale, from people across the UK. Working directly with people affected by neurological conditions through an innovative web-based technology has been developed and continues to evolve, along with ways for people that do not have access to digital technology to share their daily realities.

Through NeuroLifeNow people share how neurological condition(s) have impacted every aspect of their life. From accessing treatment, care, and support, to home life, work and finances. People do so with confidence that what they share is treated sensitively and handled securely.

Foreword

As the dust settles following the UK General Election, and the new Labour Government establishes their priorities, this report is a timely reminder of what the new UK Government needs to get to work on without delay, for people affected by neurological conditions.

In January and February, you were clear about your priorities for the new Government - improve access to specialists, and quickly. 9 out of 10 people who responded to NeuroLifeNow said this was a priority for them.

New Neuro Champions elected

At the Neurological Alliance, we are carefully thinking about how we can work together to ensure Labour prioritises the needs of people affected by neurological conditions. More than 1000 people wrote to their local candidates during the General Election to call on them to become a 'Neuro Champion' if elected - that means speaking up and out on the issues that matter to people living with neurological conditions, including improving access to specialists. 11 MPs have already signed up to become a Neuro Champion as a result, and many more are being approached about signing up now they have been elected.

In the January-February survey, many people indicated that they would be willing to play a more active campaigning role with the new Government - 27% said they would speak to the local press about their experiences, and 16% said they would speak up with their local politicians at an event. We will use these helpful insights to shape the next phase of the Neuro Champion campaign, ensuring we provide a number of ways for people to speak up and out about their experiences.

Access to support remains patchy, but important

71% of people said they found their medical appointments helpful, and 74% of people who had an appointment had face to face appointments. This is a

distinct shift from the heights of the pandemic, where telephone and videoconference appointments were used more routinely. It is critical that people affected by neurological conditions are given a choice for appointment format – possibly avoiding lengthy travel, but also ensuring people are able to access face to face time with healthcare professionals when they need it.

Mental health needs are not being met

Worryingly, the percentage of people reporting that their mental health needs are not being met at all is high – nearly 4 in 10 reported this in January and February. The NHS in England has confirmed that no person with a neurological condition should be turned away for mental health support if they need it. We are working hard to ensure this is implemented, and that countries across the UK make a similar promise. Importantly, we want to see commitments from Governments across the UK to grow the health and care workforce for mental health too.

If you need support, the Brain & Spine Foundation neuroscience nurses are here for you, providing practical and emotional support relating to any neurological condition(s). You can get in touch for free by calling our specialist nurse run helpline on 0808 808 1000 (Mon-Fri, 9am – 4pm) or email helpline@brainandspine.org.uk.

Thank you,

The Brain & Spine Foundation Team

Georgina Carr, CEO, The Neurological Alliance, England

Key Findings

We received **650 responses** in January to February 2024. **109 conditions** were represented, and 46% of people reported living with more than one condition. We asked respondents to list any neurological conditions/symptoms that they experience that are not listed in the prior questions. **Anxiety** and **memory problems** were listed most often.

45% of respondents were diagnosed 10 or more years ago. 76% said their neurological condition(s) **impacted their life to a great or large extent.**

90% of people said **improving access to specialists** was a **priority** for the **next UK Government.** 52% said access to appropriate **mental health support** should be a priority, and 51% said access to **financial support.**

50% of respondents said they would use email candidates to campaign for change, 47% said they would use **key messaging** and 44% said they would use **social media templates.**

16% of people said they were confident enough to write to their local candidates by post, 43% said they were confident to write to them using email. 7% said they were confident enough to **take part in a stunt or protest to campaign,** 16% said this about speaking to the local press.

64% of respondents said they had at least one medical appointment in the eight weeks before taking the survey. 25% said they had three or more appointments.

72% of those who had appointments said they found them helpful. 38% had an appointment with their GP, 17% with their specialist nurse and 14% with a neurologist.

74% reported having a **face-to-face appointment.**

57% said they felt anxious, 31% said they felt hopeless. Just 17% felt well supported. In parallel, 39% of people said their mental health needs were not being met at all. Those with multiple neurological conditions were more likely to report this (46%).

UK General Election priorities and campaign

Priorities for the next UK Government

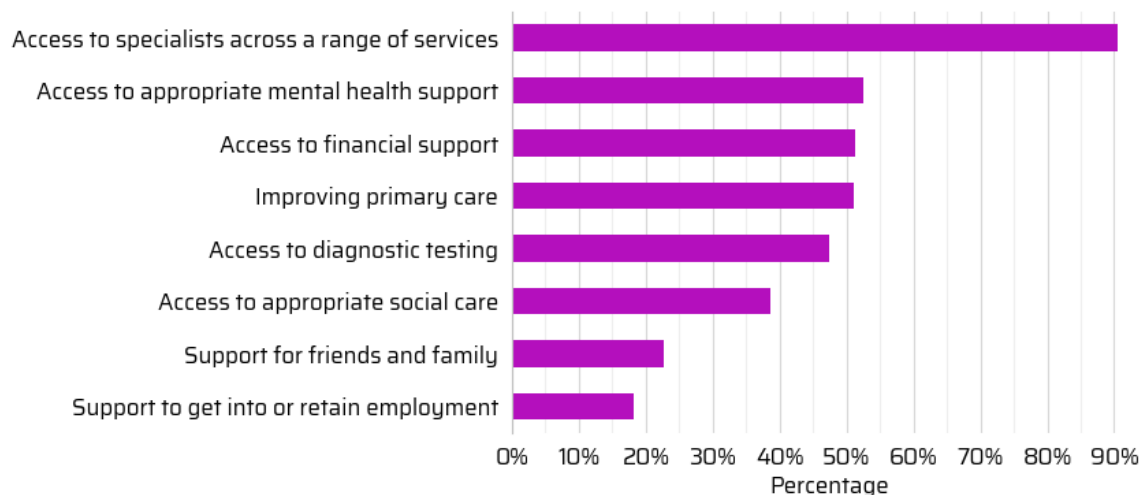

Figure 1: Priorities for the next UK Government.

Table 1: Priorities for the next UK Government.

Response	Respondents	Percentage
Access to specialists across a range of services	588	90.46
Access to appropriate mental health support	341	52.46
Access to financial support	333	51.23
Improving primary care	332	51.08
Access to diagnostic testing	308	47.38
Access to appropriate social care	251	38.62
Support for friends and family	147	22.62

Support to get into or retain employment	118	18.15
---	-----	-------

Note: Each respondent can select multiple responses for this question, so the total number of responses may not match the total number of respondents. The percentages provided indicate the proportion of responses relative to the total number of respondents.

Support from charities to campaign

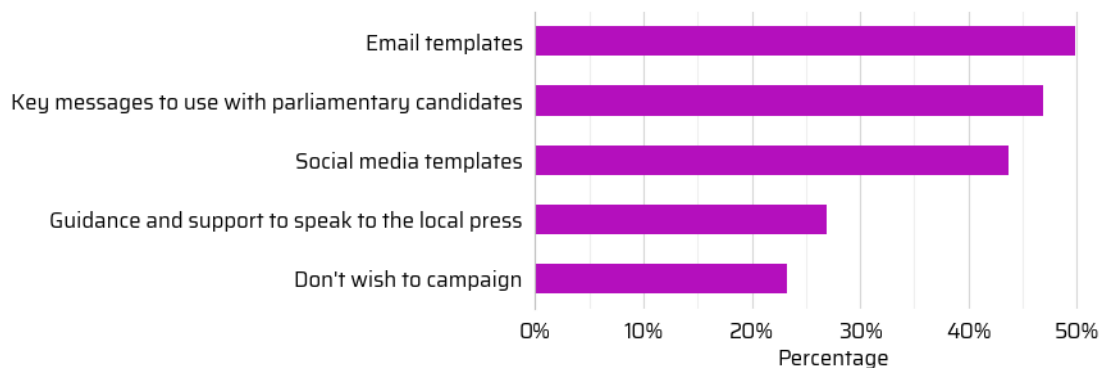

Figure 2: Support from charities to campaign.

Table 2: Support from charities to campaign.

Response	Respondents	Percentage
Email templates	324	49.85
Key messages to use with parliamentary candidates	305	46.92
Social media templates	284	43.69
Guidance and support to speak to the local press	175	26.92
Don't wish to campaign	151	23.23

Note: Each respondent can select multiple responses for this question, so the total number of responses may not match the total number of respondents. The percentages provided indicate the proportion of responses relative to the total number of respondents.

Demographics

Sample size

Total number of respondents: 650

Diagnosis status

Figure 33: Diagnosis status of the respondents.

Table 33: Diagnosis status of the respondents.

Diagnosis status	Respondents	Percentage
Yes	625	96.15
Awaiting diagnosis	16	2.46
No diagnosis	9	1.38

Recency of diagnosis

Figure 34: Recency of the respondents' first diagnosis with a neurological condition.

Table 34: Recency of the respondents' first diagnosis with a neurological condition.

Recency	Respondents	Percentage
Within last year	38	5.85
1-3 years	99	15.23
3-5 years	77	11.85
5-10 years	119	18.31
>10 years	292	44.92
No response or N/A	25	3.85

Location

Figure 35: Location of the respondents.

Table 35: Location of the respondents.

Regions	Respondents	Percentage
South East	102	15.69
East of England	86	13.23
Midlands	84	12.92
South West	66	10.15
North East and Yorkshire	63	9.69
Scotland	49	7.54
London	48	7.38
North West	48	7.38
Wales	31	4.77
Northern Ireland	7	1.08
Isle of Man	1	0.15
No/invalid response	103	15.85

Note: The regions in England are further divided into 'NHS England Regions'. We asked respondents for the first part of their postcodes. 37 of the respondents have postcodes that span across two or more regions on the map. e.g. some postcodes span across both London and South East, or both Wales and Midlands, etc. Therefore, we do not have the information about which of the two regions these respondents are actually in. For Figure 5 and Table 5, if a postcode spans across two areas, we add 1 to each of these areas. 103 respondents did not provide their postcodes or offered invalid postcodes, and therefore were not included in this analysis.

Neurological conditions

Note: A single respondent may have multiple neurological conditions, so the total number of conditions may not add up to the total number of respondents. The percentages provided indicate the proportion of responses relative to the total number of respondents. 300 respondents (46.15% of the respondents that had answered this question) indicated that they have multiple neurological conditions.

Figure 36: Respondents had been diagnosed with the following neurological condition(s).

Table 36: Respondents had been diagnosed with the following neurological condition(s)..

Condition	Respondents	Percentage
Dystonia	84	12.92

Additional neurological conditions/symptoms

Respondents were asked to list any neurological conditions/symptoms that they experience that are not listed in the prior questions. Some of the most frequently mentioned ones are as below:

Table 37: Additional neurological conditions/symptoms.

Conditions/Symptoms	Respondents	Other phrasings described by the respondents
Memory problems	7	“memory loss”
Anxiety	7	
Depression	6	
Fatigue	6	“Post Stroke Fatigue”
Sleep apnoea	6	“obstructive sleep apnoea”
Seizures	5	“focal motor seizures”, “functional seizures”, “Post stroke seizures”
Intracranial hypotension	5	“Spontaneous Intracranial Hypotension”
Neuropathy	5	“sensorimotor axonal neuropathy”, “peripheral neuropathy”, “Autonomic Neuropathy”, “Small fibre neuropathy”
Brain fog	4	
Tremor	4	“functional tremor”
Autism	4	
Functional cognitive disorder	3	
Radiculopathy	3	
Spasms	3	
Tinnitus	3	
Speech problems	3	
Vision problems	3	
Paralysis	3	“Global paralysis”, “Todd's paralysis”

Stenosis	3	“lumber stenosis”, “spinal stenosis”
Numbness	3	

Symptoms without diagnosis

Table 38: Some of the most common symptoms experienced by respondents awaiting diagnosis.

Response	Number	Other phrasing
Headache	6	“orthostatic headache”, “head pain”
Dizziness	5	
Tingling and numbness	4	
Migraine	3	
Nausea	3	
Fatigue	3	
Balance problems	3	“loss of balance”
Cervical stenosis	3	
Lumber stenosis	3	

Multiple neurological conditions

Figure 37: Whether respondents were diagnosed with multiple neurological conditions.

Table 39: Whether respondents were diagnosed with multiple neurological conditions

Multiple neurological conditions	Respondents	Percentage
Yes	300	46.15
No	325	50.0
No response	25	3.85

Number of non-neurological co-occurring conditions

Figure 38: Number of non-neurological conditions that respondents were diagnosed with that co-occur with their neurological condition(s).

Table 40: Number of non-neurological conditions that respondents were diagnosed with that co-occur with their neurological condition(s).

Number of conditions	Respondents	Percentage
0 or no response	171	26.31
1	175	26.92
2	136	20.92
3	84	12.92
4	30	4.62
5	24	3.69
6+	30	4.62

Gender

Receive care/support	Respondents	Percentage
No	284	43.69
No but I would like this	96	14.77
Yes and I do not pay	116	17.85
Yes and I pay a contribution out of my benefits	29	4.46
Yes and I pay for this	91	14.0
Not applicable	34	5.23
No response	0	0.0

Appendix A – Survey Questions

Question	Response options		
Are you filling in this questionnaire for yourself?	Yes	No	
<p>About your condition(s)</p> <p>The next few questions are about your neurological condition(s). By sharing your condition(s) and symptoms with us, we can identify variation in care and support. You cannot be identified through the information that you share.</p>			
<p>Have you been diagnosed with a neurological condition(s) or symptom(s)?</p> <p>Please note:</p> <p>Awaiting diagnosis = waiting for the results of a test or a meeting with a specialist to confirm diagnosis.</p> <p>No diagnosis = no medical advice has been sort or a possible diagnosis has not been identified yet.</p>	Yes	Awaiting diagnosis	No diagnosis
<p>As you are either awaiting a diagnosis or do not have one, please share with us the symptoms that you are experiencing.</p> <p>Where possible please list or summarise your symptoms as much as you can.</p>	Free text		
<p>How long has it been since you were diagnosed with your primary neurological condition?</p> <p>If you have multiple conditions the primary condition is the one you feel has the greatest impact on your life.</p>	Within the last year	1-3 years	3-5 years
	5-10 years	Greater than 10 years	
<p>Please tell us which neurological condition you were first diagnosed with.</p> <p>Please note if your condition(s) are not listed in the drop down below, there is an opportunity to share them in a subsequent question. If so, please select 'My condition(s) are not listed'.</p>	See Appendix B for a list of conditions and symptoms		

<p>Do you have any other neurological condition(s) and/or symptoms you would like to add?</p> <p>Please select 'No' if your condition(s) or symptoms was not listed in the previous question.</p>	Yes	No
<p>Please tell us a second neurological condition and/or symptom you have.</p> <p>Please note if your condition(s) are not listed in the drop down below, there is an opportunity to share them in a subsequent question. If so, please select 'My condition(s) are not listed'.</p>	See Appendix B for a list of conditions and symptoms	
<p>Do you have any other neurological condition(s) and/or symptoms you would like to add?</p> <p>Please select 'No' if your condition(s) or symptoms was not listed in the previous question.</p>	Yes	No
<p>Please tell us a third neurological condition and/or symptom you have.</p> <p>Please note if your condition(s) are not listed in the drop down below, there is an opportunity to share them in a subsequent question. If so, please select 'My condition(s) are not listed'.</p>	See Appendix B for a list of conditions and symptoms	
<p>Do you have any other neurological condition(s) and/or symptoms you would like to add?</p> <p>Please select 'No' if your condition(s) or symptoms was not listed in the previous question.</p>	Yes	No
<p>Please tell us a fourth neurological condition and/or symptom you have.</p> <p>Please note if your condition(s) are not listed in the drop down below, there is an opportunity to share them in a subsequent question. If so, please select 'My condition(s) are not listed'.</p>	See Appendix B for a list of conditions and symptoms	
<p>Do you have any other neurological condition(s) and/or symptoms you would like to add?</p> <p>Please select 'No' if your condition(s) or symptoms was not listed in the previous question.</p>	Yes	No
<p>Please tell us a fifth neurological condition and/or symptom you have.</p> <p>Please note if your condition(s) are not listed in the drop down below, there is an opportunity to share them in a subsequent question. If so, please select 'My condition(s) are not listed'.</p>	See Appendix B for a list of conditions and symptoms	

<p>Do you have any other neurological condition(s) and/or symptoms you would like to add?</p> <p>Please select 'No' if your condition(s) or symptoms was not listed in the previous question.</p>	Yes		No	
<p>Please tell us a sixth neurological condition and/or symptom you have.</p> <p>Please note if your condition(s) are not listed in the drop down below, there is an opportunity to share them in a subsequent question. If so, please select 'My condition(s) are not listed'.</p>	See Appendix B for a list of conditions and symptoms			
<p>Are there any other neurological conditions or symptoms not listed under the previous question(s) that you would like to make us aware of?</p>	Yes		No	
<p>Please list below any neurological conditions or symptoms that you experience that are not listed in the prior questions.</p> <p>We ask this as it is essential that you feel that NeuroLifeNow accurately represents you and the community of people affected by neurological conditions.</p> <p>Any conditions and symptoms shared here will be considered for inclusion in future surveys.</p>	Free text			
<p>Do you live with conditions other than your neurological condition(s)? If so, how many:</p> <p>This means any other long-term condition which is not neurological. It might include conditions related to your mental health, heart, lungs or joints.</p>	None	1	2	3
	4	5	6+	
<p>Campaigning for improvements to support for people affected by neurological conditions in the run up to the next General Election.</p> <p>There will be a General Election in the UK before January 2025. We wish to hear from you about your priorities for the political parties and whoever forms the next UK Government.</p>				

<p>Overall, what are the most important issues the next UK Government should address for people affected by neurological conditions?</p>	Access to specialists across a range of services (including consultants, nurses, physiotherapists and occupational therapists).					
	Access to appropriate mental health support.					
	Access to financial support.					
	Access to appropriate social care.					
	Access to diagnostic testing.					
	Support for friends and family.					
	Support to get into or retain employment.					
	Improving primary care.					
	Other					
<p>We want as many Parliamentary candidates as possible to show their support for people affected by neurological conditions.</p> <p>With this in mind, what support could the charity sector provide in order to support you to campaign in the run up to the General Election?</p>	Social media templates.					
	Email templates.					
	Guidance and support to speak to the local press.					
	Key messages to use with parliamentary candidates.					
	I don't wish to campaign for neurological conditions in the run up to the next election.					
	Other					
<p>We would now like to understand what actions you might take to encourage candidates and the next UK Government to listen to people affected by neurological conditions.</p> <p>Please indicate your level of confidence for each of the following campaign actions in the run-up to the next UK General Election:</p>						
<p>Asking Parliamentary candidates, a question at a local event.</p>	0	1	2	3	4	5

Writing to your local candidates by post.	0	1	2	3	4	5
Writing to your candidates by email.	0	1	2	3	4	5
Speaking to the local press.	0	1	2	3	4	5
Taking part in a stunt or protest.	0	1	2	3	4	5
About your recent experiences of treatment and support						
We would like you to rate the quality of care and support services that you have used recently. This includes specialist NHS care, emergency care (e.g. via A&E), social care or support from your GP.						
These questions are asked in every survey to help us monitor changes over time.						
Have you accessed health or care (from the NHS, a care provider and/or privately) in the past eight weeks?	Yes			No		
Overall, how would you describe your experience of health or care in the last eight weeks?	Very Good		Good		Average	
	Poor		Very Poor		N/A	
How many times have you sought A&E/emergency support from the NHS as a result of your neurological condition in the last eight weeks?	None					
	1-2 times					
	3-5 times					
	5 or more times					
Have you had any medical appointments (including remote appointments) in the last eight weeks?	Yes		No		Don't know	
How many medical appointments have you had in the last eight weeks?	0		1		2	
	4		5		6+	
Who was your first medical appointment with?	Neurologist					
	Specialist Nurse					
	Physiotherapist					

	Speech and Language Therapist
	Occupational Therapist
	Psychologist/ Psychiatrist
	GP
	Social Services
	Neurosurgery
	Diagnostics services (e.g. a radiologist, physiologist)
	Rehabilitation service
	Other Free Text
How was your first medical appointment delivered?	Phone
	Videoconference
	Via text/WhatsApp
	Face to face
	Other Free text
How helpful was your first medical appointment?	It was helpful
	It was not helpful
	Don't Know
Who was your second medical appointment with?	Neurologist
	Specialist Nurse
	Physiotherapist
	Speech and Language Therapist
	Occupational Therapist
	Psychologist/ Psychiatrist
	GP

	Social Services
	Neurosurgery
	Diagnostic services (e.g. a radiologist, physiologist)
	Rehabilitation service
	Other Free text

How was your third medical appointment delivered?	Phone
	Videoconference
	Via text/WhatsApp
	Face to face
	Other Free text
How helpful was your third medical appointment?	It was helpful
	It was not helpful
	Don't Know
Who was your fourth medical appointment with?	Neurologist
	Specialist Nurse
	Physiotherapist
	Speech and Language Therapist
	Occupational Therapist
	Psychologist/ Psychiatrist
	GP
	Social Services
	Neurosurgery
	Diagnostic services (e.g. a radiologist, physiologist)
	Rehabilitation service
Other Free text	
How was your fourth medical appointment delivered?	Phone
	Videoconference
	Via text/WhatsApp

	Face to face
	Other Free text
How helpful was your fourth medical appointment?	It was helpful
	It was not helpful
	Don't Know
Who was your fifth medical appointment with?	Neurologist
	Specialist Nurse
	Physiotherapist
	Speech and Language Therapist
	Occupational Therapist
	Psychologist/ Psychiatrist
	GP
	Social Services
	Neurosurgery
	Diagnostic services (e.g. a radiologist, physiologist)
	Rehabilitation service

	Videoconference
	Via text/WhatsApp
	Face to face
	Other Free text
How helpful was your sixth medical appointment?	It was helpful
	It was not helpful
	Don't Know
To what extent do you feel your mental wellbeing needs are being met?	To a great extent
	To a moderate extent
	To a small extent

	Not at all
	Don't Know
<p>Quality of life and wellbeing</p> <p>We know that having a neurological condition(s) affect all aspects of a person's life. These next questions look to capture how your life and wellbeing are affected.</p>	
<p>Which of the following describes how you feel at the moment? Please select all that apply.</p>	Calm
	Well supported
	Anxious
	Hopeless
	Lonely
	Other Free text
<p>What other words would you use to describe how you feel at the moment?</p>	Free text
<p>To what extent is your quality of life affected by your neurological condition?</p>	To a great extent
	To a large extent
	Somewhat
	A little
	Not at all
<p>About you</p> <p>The following questions help us to identify any potential variation in the daily realities, care, and support, while also aiding us in striving to be as representative as possible.</p>	
<p>What is your age range?</p>	Under 18 years of age
	18 to 24 years of age
	25 to 34 years of age

	35 to 44 years of age
	45 to 54 years of age
	55 to 64 years of age
	65 to 69 years of age
	Over 70 years of age
To which of these ethnic groups do you belong?	White British
	White Irish
	Any other White background
	White and Black Caribbean
	White and Asian
	Any other mixed background
	Indian
	Pakistani
	Bangladeshi
	Any other Asian background
	Caribbean
	African
	Any other Black background
	Chinese
Any other ethnic background	
What is your gender?	Male
	Female
	Prefer to self-describe
	Prefer not to say

What is your sexual orientation?	Aromantic			
	Asexual			
	Bisexual			
	Gay man			
	Gay woman/lesbian			
	Pansexual			
	Queer			
	Straight (heterosexual)			
	Prefer not to say			
	Other		Free text	
	What best describes your employment status?	Employed (full time)		
Employed (part time)				
Self-employed (full-time)				
Self-employed (part-time)				
Homemaker				
Student				
Out of work				
Unable to work				
Retired				
Prefer not to say				
Other		Free text		
How many dependents live with you?	1	2	3	4
	5	6+		
	Yes and I pay for this			

Do you receive any care or support at home for your day-to-day life?	Yes and I pay a contribution out of my benefits
	Yes and I do not pay
	No but I would like this
	No
	Not applicable
<p>Communicating with you.</p> <p>If you are happy to hear from us about how your support is benefitting people affected by neurological conditions, please complete the following questions. You can stop receiving communications or change any of your preferences at any time by contacting us at: info@neurolifenow.org. For full details of what information, we hold and how we process your data, please see our privacy policy.</p>	
<p>What is your first name?</p> <p>Your name will only be used for communications purposes. They will not be used as part of the research or shared with third parties.</p>	Free text
<p>What is your surname?</p> <p>Your name will only be used for communications purposes. They will not be used as part of the research or shared with third parties.</p>	Free text
<p>What is your Email Address?</p> <p>Your email will only be used for communications purposes. It will not be used as part of the research or shared with third parties.</p>	Free text
<p>What is the first line of your address?</p> <p>Your address will only be used for communications purposes. It will not be used as part of the research or shared with third parties.</p>	Free text
<p>The first part of your postcode?</p> <p>i.e. E1, HP15, L1, EC1, etc</p>	Free text

<p>The first part of your post code is used in the research to identify differences in experience depending on where people live in the UK, while also allowing us to monitor if we are reaching people from all over the UK.</p> <p>It is also used for communication purposes.</p>	
<p>What is the second part of your postcode?</p> <p>The second part of your postcode will be combined with the first part and used for communications only.</p> <p>It will not be used as part of the research or shared with third parties.</p>	<p>Free text</p>

Appendix B – List of Conditions

Abdominal migraine	Acquired brain injury	Acute poliomyelitis
ADHD	Agnosia	Amoebic brain abscess
Apraxia	Arnold-Chiari syndrome	Arteriovenous Malformation
Ataxia	Bell's palsy	Bipolar
Brain or spine tumour	Brown-Séquard syndrome	Cauda Equina Syndrome
Cavernoma	Central Pontine Myelinolysis	Cerebellar tremor
Cerebral Aneurysms (Ruptured/Unruptured)	Cerebral cysts	Cerebral Palsy
Cerebrospinal fluid leak	Cervical stenosis	Chagas' disease
Charcot-Marie-Tooth Disease	Chiari Malformation	Chronic fatigue syndrome
Chronic Inflammatory Demyelinating Polyneuropathy	Chronic migraine	Clonic hemifacial spasm
Cluster headache	Complex regional pain syndrome	Cranial nerve disorder
Creutzfeldt-Jakob disease	Cyclical vomiting syndrome	Cysticercosis of central nervous system
Dementia	Demyelinating disease	Disorder of visual pathways
Disorders of hypoglossal nerve	Disorders of multiple cranial nerves	Disorders of olfactory nerve
Disorders of optic chiasm	Disorders of other specified cranial nerves	Disorders of other visual pathways
Disorders of vagus nerve	Disorders of visual cortex	Down's Syndrome
Dysarthria and anarthria	Dysexecutive Syndrome	Dyslexia and alexia
Dysphasia and aphasia	Dystonia	Dystonic tremor
Eaton-Lambert syndrome	Ehlers Danlos Syndromes	Encephalitis
Enhanced physiologic tremor	Epidemic vertigo	Epilepsy
Essential tremor	Extradural and subdural abscess	Extrapyramidal disorder
Facial myokymia	Faetal Alcohol Spectrum Disorders (FASD)	Fatal Familial Insomnia syndrome
Fibromyalgia	Functional Neurological Disorder	Functional tremor
Geniculate ganglionitis	Guillain-Barre syndrome	Headache

Headache associated with exercise	Hemicrania continua	Hemicranial Corrina
Hemiplegia	Hemiplegic migraine	Hereditary Spastic Paralegia
High altitude headache	Huntington's disease	Hydrocephalus
Hydromyelia	Hypnic headache	Intacranial hypertension
Intracranial abscess and granuloma	Intracranial and intraspinal abscess and granuloma in diseases classified elsewhere	Intracranial and intraspinal phlebitis and thrombophlebitis
Intraspinal abscess and granuloma	Kennedy's disease	Leukoencephalitis
Long COVID	Mal de Debarquement Syndrome	Malaria
Medication overuse headache	Melkersson's syndrome	Meningeal tuberculoma
Meningitis	Menstrual migraine	Migraine
Migraine with aura	Migraine with brainstem aura	Migraine without aura
Motor neurone disease	Multiple sclerosis	Multiple system atrophy
Muscular dystrophy	Myalgic encephalomyelitis (ME)	Myasthenia Gravis
Mycoses	Myelopathy	Myopathy
Myositis	Myotonic disorders	Narcolepsy and cataplexy
Nerve Injury	Nerve palsy	Nerve Tumour
Neurofibromatosis	Neuromyelitis optica	Neuropathy
Neurosarcoidosis	Optic atrophy	Orthostatic tremor
Papilloedema	Paraplegia and tetraplegia	Parkinsonian tremor
Parkinsonism / Parkinson's	Peripheral Neuropathy	Pernicious Anaemia
Post-polio syndrome	Postzoster neuralgia	Progressive multifocal leukoencephalopathy
Rabies	Radiculopathy	Rare and other neurological diseases
Refsum's Disease	Restless Leg Syndrome	Schwanomatosis
Short Fibre Neuropathy	Spina Bifida	Spinal cord injury
Spinal muscular atrophy	Split Cord	Spondylosis
Stroke/TIA	Subacute sclerosing panencephalitis	Subarachnoid hemorrhage
Superficial Siderosis	Syringomyelia and syringobulbia	Tarlov Cysts

Tension type headache	Tethered Cord	Tourette Syndrome
Toxic encephalopathy	Toxoplasma meningoencephalitis	Transverse myelitis
Traumatic Brain Injury	Tremor	Trigeminal neuralgia
Tuberculous meningitis	Vascular myelopathies	Vestibular migraine
My condition(s) are not listed
